Hi, Joy.

Thanks for the heads up. I chatted a bit with Jeannine yesterday, but I wanted to touch base with you and Paula before we contacted the editor. He is very difficult to reach by phone, so we may just want to draft an email clarifying the situation. I'll keep you in the loop.

Hi Cynthia (and Steve) –

I forwarded this to Wendy already, on page 3 of attachment bottom section furthest right column. The editor indicates that there is EPA mission creep at the Nelson Tunnel Site, the editor suggests that there are two areas that EPA has identified for NPL designations in the Creede area.

Wendy and I think the editor may be getting confused with the Willow Creek Reclamation Committees efforts to get funding for flood plain work and the Solomon mine?

Wendy contacted Jeannine to see about contacting the editor to determine what he is talking about and stop the rumor that Superfund has Mission Creep in Creede. Jeannine may call you to assist with this effort.

Thanks – Joy

Hi Joy

You may be interested in the editorial portion of this (on page 3 actually). Superfund in Creede is mentioned. Do you know of the 2 other sites in the Creede area that they mention?

Hi, All.

See the article about SGC's response and related editorial on page 5.
